

Lucidchart for the Atlassian Suite

Harness the power of collaborative, visual communication within the Atlassian apps you already use.

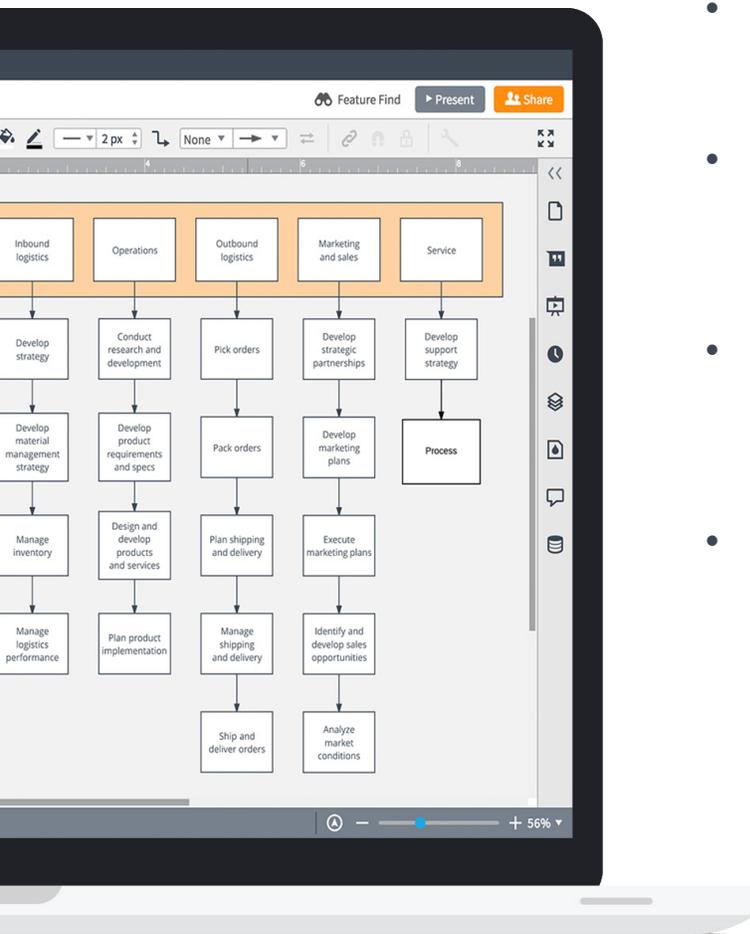

Visual Productivity Platform

Lucidchart helps users increase their productivity by 38%.

With Lucidchart, you can visualize ideas, information, and processes anywhere you work, even in your favorite Atlassian apps. Embed any document—from a simple org chart to a complex network architecture—in Confluence, JIRA, and HipChat, and increase your ability to understand and share information with clarity.

By choosing our platform, you can:

- **Visualize with ease.** Lucidchart requires no special training—the platform is so intuitive that you can start in minutes.
- **Share with anyone.** Because Lucidchart updates in real time, multiple people can work on the same diagram simultaneously, and you can maintain a single source of truth for your team to reference.
- **Work from anywhere.** Lucidchart is compatible with Mac, Windows, and Linux, and in addition to the Atlassian Suite, it integrates with G Suite, Slack, Microsoft Office, and other leading apps.
- **Automate your work.** Link live data to your shapes, and build ERDs, AWS network diagrams, UML sequence diagrams, and org charts in less time with our import features.

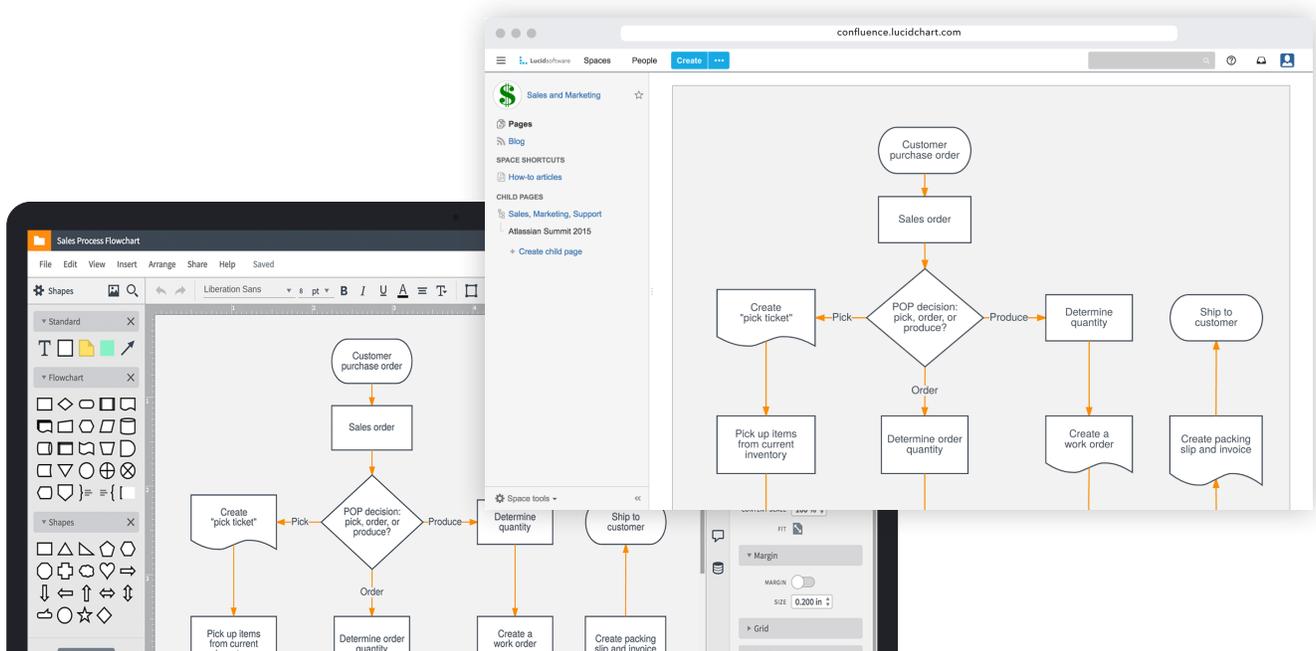

Lucidchart for Confluence

Whether you use Confluence for project management or as a team wiki, Lucidchart will help you communicate effectively with your team.

- Brainstorm ideas with a mind map and share them in Confluence for quick reference.
- Pair your documentation with flowcharts they are easy to understand in a glance.
- Attach diagrams to Confluence conversations to clarify problems and responsibilities.
- Create and attach an org chart that automatically updates when you make changes in Lucidchart.
- Build standardized onboarding material for new hires.

“Lucidchart allows teams to more accurately and efficiently reflect what their commitments are . . . Lucidchart is working wonders for us.”

Kunal Arora
Senior Program Manager
DocuSign

Lucidchart for JIRA

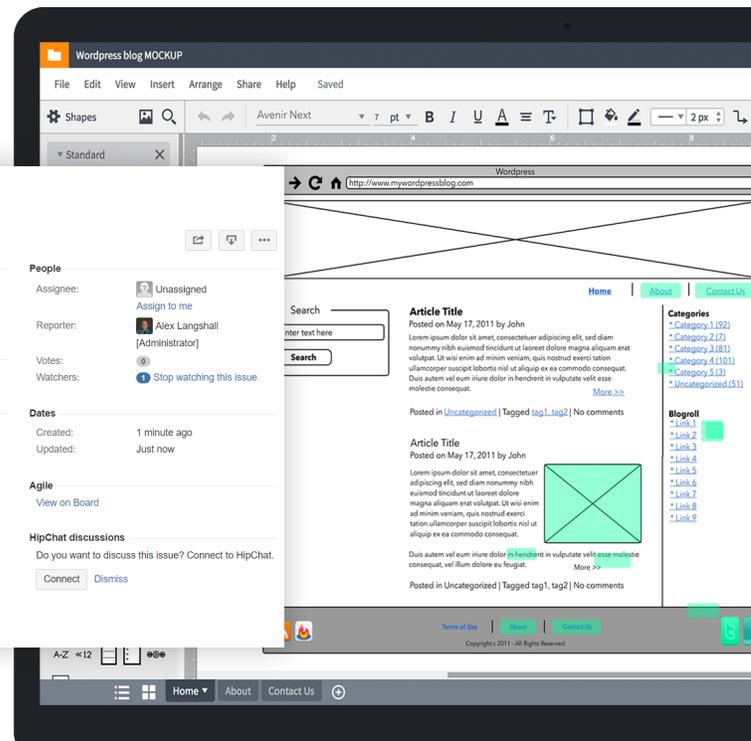

“I love the way my diagram is displayed on the page in JIRA. I never have to scroll down or open an attachment—there’s a preview I can easily reference when I’m working on a ticket or a project implementation.”

Kailey Roeder
2U, Inc.

Here are some ways the Lucidchart integration for JIRA will help your team.

- Keep everyone on the same page using diagrams as a single source of truth.
- Solve problems when you loop in additional expertise using Lucidchart’s commenting features.
- Save time when you avoid the hassle of tracking down the most recent diagram. They are all saved right there in the cloud.

The screenshot shows a JIRA ticket for 'Build the user interface' with a status of 'BACKLOG'. The ticket details include: Type: Task, Priority: Medium, Status: BACKLOG, Resolution: Unresolved. The description states 'It should look like the mocks attached.' Under the 'Lucidchart Diagrams' section, a diagram titled 'WordPress Blog Wireframe' is displayed. The diagram is a wireframe of a WordPress blog layout, showing a header with a search bar and navigation links, a main content area with article titles and excerpts, and a sidebar with categories and a blogroll. The diagram is rendered as a preview within the JIRA ticket interface.

Lucidchart for HipChat

Facilitate innovation when you integrate Lucidchart with HipChat.

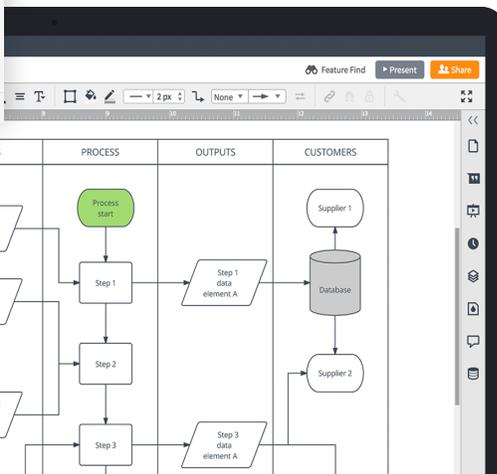

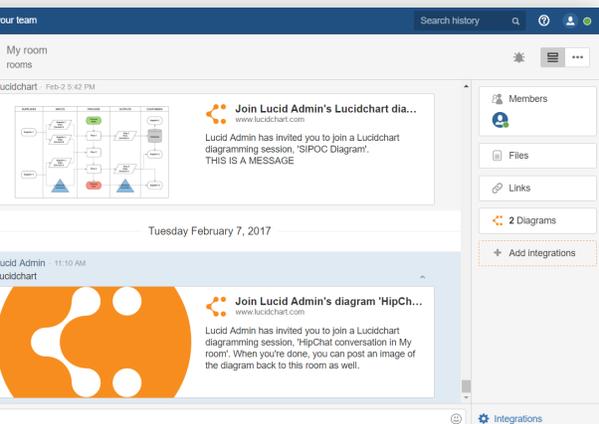

Use our add-on to present your ideas visually right where your conversation is taking place. Others can then comment and critique as you continue to ideate.

How to set up the integrations

Administrators can set up Lucidchart integrations in a few simple steps.

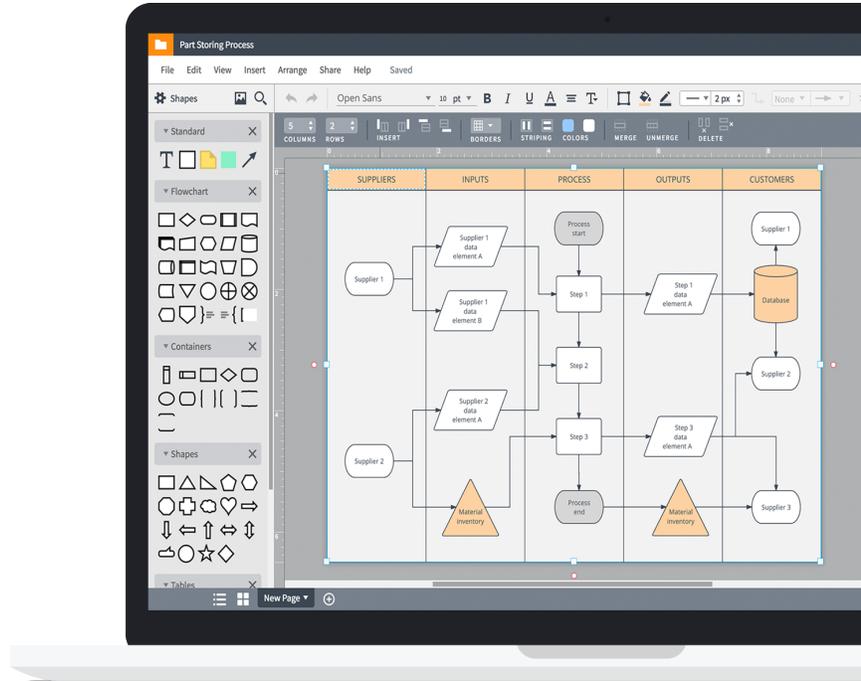

1. Search for Lucidchart in the Atlassian Marketplace, and select your desired add-on for Confluence, JIRA, or HipChat.
2. Follow the instructions for installation.
3. In Atlassian, use the macro command "{lucidchart}" to open Lucidchart and start diagramming.

Our Confluence and HipChat integrations are available for Team and Enterprise accounts, and our JIRA integration is available for Enterprise accounts. If you're interested in upgrading, talk to our sales team at 650-733-6172.

Lucidchart in Action

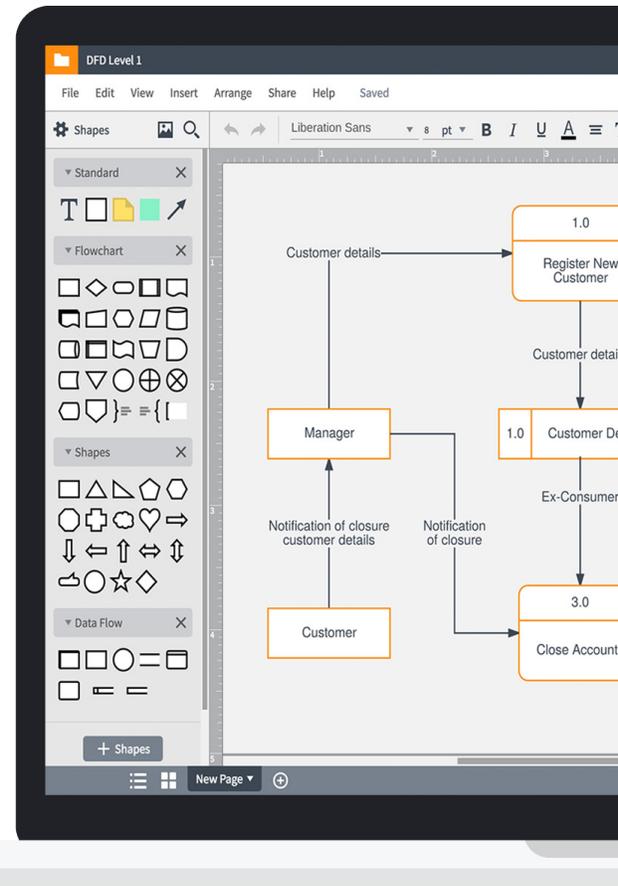

Trevor Bryant, Senior Network Engineer at LogMeIn, oversees the network infrastructure of all the company's North American offices, and he creates network diagrams to document and help others understand the layout of each location.

By combining the visual power of Lucidchart with the collaborative environment in Confluence, Trevor has centralized his network architecture and effortlessly keeps his organization up to date.

No duplicate work of uploading diagrams again.

No risk of outdated information.

Trevor is one of thousands of network engineers who use Lucidchart to share knowledge across their companies. And it's no wonder why—network engineers report that Lucidchart has helped them increase transparency by 57%. Find out what Lucidchart can do for you.

The most powerful diagramming solution on the market

“You could say that getting people to understand a process just by looking at a diagram rather than searching through written-out instructions has saved us hundreds, thousands, tens of thousands, hundreds of thousands of dollars depending on how far reaching the process extends. For me, Lucidchart is just invaluable.”

Steve Groff
Process Engineer
